Applicant's response to restriction requirement filed 10/9/2008 is acknowledged. Applicant elected Group I, claims 1-25, drawn to a conjugate comprising a magnetic polymer bound to carboxymethylated aspartate ligand chelating Ni and a process of making and using said product. Claim 26 and all other metal conjugates together with processes of making and utilizing thereof are hereby withdrawn.

Upon review of previous office action further restriction deemed necessary as following :

Group I(A): claims 1, 9-14 and 19, drawn to a conjugate comprising a magnetic polymer particle bound to a carboxymethylated aspartate chelating ligand and a method of making said product.

Group I(B) see below: claims 2-8, 16-18, 19-22 and 23-24, drawn to a conjugate comprising a magnetic polymer particle bound to a carboxymethylated aspartate chelating ligand and a metal (Ni) atom or iron as well as methods of making and utilizing said product.

The inventions shown above lack a common special technical feature because the technical feature of Group I(A) is magnetic polymer particle attached to a carboxymethylated aspartate ligand and the special technical feature of Group I(B) is magnetic polymer particle attached to a carboxymethylated aspartate ligand chelated with a metal, which are structurally and functionally different and therefore have nothing in common.

Applicant is advised to elect a single invention from Groups I(A), I(B) in response to this office action, even though said election may be traversed.
